I am an AI Engineer and aspiring Solution Architect passionate about leveraging my wide domain knowledge to deploy cutting-edge solutions. Proven designer of agentic AI systems while managing client relationships and project lifecycles. Aspiring to bridge the world of technicality with the "ordinary" world.

1 Education

Rijksuniversiteit Groningen

Groningen, NL

BSc in Artificial Intelligence

- **Relevant Coursework:** Machine Learning, Neural Networks, Data Structures & Algorithms, Logic, Cognitive Modeling, Agent Systems, Computational Linguistics.

2 Core Competencies

AI/ML: LLM Integration, Agentic Systems, Prototyping, Neural Networks, Data Science

Languages: Python, TypeScript, Node.js, SQL

Frameworks & DBs: React, Next.js, Neo4j, PostgreSQL, REST APIs, WebSockets

Solution & Business Acumen: Customer-Facing Technical Discovery, Project Management, Stakeholder Communication, Value Articulation

Tools & Platforms: Git, Docker, Linux, Figma

3 Professional Experience

Lead Architect Developer – Agentic AI Learning Platform

2023 – Present

- **Architected** a full-stack, conversational AI platform to deliver personalized learning outcomes, leveraging a modern **TypeScript**, **Node.js**, and **React** stack.
- Engineered a sophisticated agentic system using a **Neo4j graph database** to model user memory, enabling highly contextual conversations informed by real-time LLM interactions.
- **Managed** the project lifecycle from initial prototype to a scalable, production-ready architecture, ensuring the development of a robust and maintainable system.

E-commerce Client Technical Support (Independent)

2021 – 2023

- Managed the full customer lifecycle, from driving sales with targeted ad campaigns to providing direct, post-sale technical support and consultation.
- Acted as the primary point-of-contact in customer-facing roles, translating technical concepts into clear solutions and ensuring a positive client experience.

Designer / Prototyper – Purple Mountain Innovations

2018 – Mar 2022

Contributed to product design and rapid prototyping in a dynamic startup environment.

4 Key AI Projects

Natural Language to SQL Query Generator

- Developed a prototype to translate natural language into SQL, fine-tuning a transformer model to improve query accuracy on a specific schema by 25%.
- *Tech Stack: Python, Hugging Face Transformers, Pandas, NLTK, SQL.*

Machine Learning & Data Science Projects

- Implemented and tuned a **Gradient Boosting Classifier** for a celestial classification task, achieving high accuracy in identifying astronomical objects from Sloan Digital Sky Survey (SDSS) data.
- Engineered a movie recommendation system using collaborative filtering to predict user ratings and personalize content suggestions.
- *Tech Stack: Python, Scikit-learn, Pandas, AstroPy.*

5 Certifications

- Neo4j Certified Professional
