Full Stack Engineer with AI/ML implementation experience, specializing in building production applications that leverage LLMs and modern web technologies. Proven track record developing solutions from prototype to deployment, with expertise in Python, React, API development, and data pipeline engineering. Skilled at bridging complex AI capabilities with practical business applications through intuitive interfaces and robust system architecture.

1 Education

Rijksuniversiteit Groningen

Groningen, NL

BSc in Artificial Intelligence

- **Relevant Coursework:** Machine Learning, Neural Networks, Natural Language Processing, Data Structures & Algorithms, Software Engineering, Human-Computer Interaction

2 Core Competencies

Languages: Python, TypeScript/JavaScript, SQL

Data: PostgreSQL, Neo4j,
Data Processing, Visualization

Full Stack: React, Node.js, Django,
REST APIs, Streamlit

Tools: Git, Docker, n8n, Linux, AWS basics

AI/ML: LLMs (OpenAI, Claude), LangChain,
Hugging Face, PyTorch, NLP

Methods: SDLC, API Design,
System Architecture

3 Professional Experience

Lead Developer – Lingo AI Language Learning Platform

2024 – 2025

Full stack development of conversational AI platform for adaptive education

- Architected production application using React, Python, and LLM integration for personalized learning experiences.
- Engineered graph database solution (Neo4j) for complex user interaction modeling and contextual responses.
- Developed data visualization components and analytics dashboards for tracking system performance.
- Maintained comprehensive testing, documentation, and code review practices throughout development.

Project Lead – Aifordable Groceries

2025

- Transformed existing system into AI-powered platform with conversational interfaces and predictive analytics.
- Built automated data processing workflows for real-time inventory optimization and reporting systems.
- Managed technical implementation while coordinating between stakeholder teams.

E-commerce & Technical Consultant (Independent)

2021 – 2023

- Provided technology consultation and process optimization for small business clients.
- Translated complex technical concepts for non-technical stakeholders.

Designer / Developer – Purple Mountain Innovations

2018 – 2022

Product development and rapid prototyping in startup environment

4 Key Projects

See coding-crying.github.io (website above) for projects

- *Tech Stack:* Python, Scikit-learn, PyTorch, Pandas, Shiny, Streamlit, Docker

5 Certifications

- Neo4j Certified Professional
